**Recycled Content is defined as Post-Consumer, Post-Use Recycled Glass as a percentage of Production.**

Consumers Glass has had a Product Stewardship Process in its Business Plan for over Ten Years, beginning in 1990. The Company has committed to using as much post-consumer, post-use recycled glass in the production of its new glass containers that is available which meets the specifications for furnace ready cullet. In that time, the company has used over 2 million metric tonnes of post-consumer, post-use recycled glass in the production of new glass containers, thus providing a strong market for glass that is diverted from disposal.
